Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: EP-A-1-279 359 (MCGILL SHANE ROBERT) 29 January 2003 (2003-01-29)

1. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

1.1 The document D1 discloses (the references in parentheses applying to this document):

- Mixing apparatus comprising a container base (3) and a container lid (2), the container lid (2) having mounted thereon mixing means (1), the mixing means (1) extending through the lid and having, at one end, means (4E) for connection to a drive motor (8) external to the container and, at the other end, a mixing element (4F) for mixing the contents of the container when the drive means is operated, the mixing means comprising a shaft portion (4C, 4D) locatable through an opening (2A) in the lid (2) and incorporating the connection means, and a mixing element portion (4F) associated with the shaft portion for rotation therewith, the container lid (2) comprising a rim portion (2A) defining a circumferential slot into which the top edge (3C) of the container is located when the lid and container are assembled.

- the mixing apparatus including a clamping member (11)
- a product access opening (see column 6, lines 8-11)

1.2 The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claims 8, 9, 12, 20 which therefore are also considered not new.
